

The screenshot displays the IBM Cognos Analytics interface. The main workspace shows a bar chart titled "sdg_index_score and goal_1_score by goal_1_score". The chart has two measures: "sdg_index_score" (represented by red bars) and "goal_1_score" (represented by blue bars). The x-axis is labeled "goal_1_score" and the y-axis is labeled "Values". The chart shows data for goal_1_score values ranging from 99.9 to 99.1. The right sidebar shows the "Fields" panel with "goal_1_score" and "sdg_index_score" selected. The bottom status bar shows "Type here to search" and system time "1:46 PM 14-Dec-23".

goal_1_score	sdg_index_score	goal_1_score
99.9	75	100
99.8	77	100
99.7	76	100
99.5	77	100
99.4	79	100
99.3	80	100
99.2	76	100
99.1	76	100

Goal 1 score by overall score by applying some data filters on subset of data.
